

McQueen High School Staff and Parent Surveys
Washoe County School District Parent Involvement Council
Evaluation Brief July 2008

Background

To learn more about how to strengthen partnerships between the district, individual schools, and parents, the Washoe County School District’s (WCSD) Parent Involvement Council (PIC) conducted a district-wide needs assessment about parent involvement (PI). The PIC is comprised of parents, school district administrative, certified and classified employees, and business representatives. The needs assessment included three components: an online administrator survey, an online teacher and staff survey, and a parent survey administered through the mail. This evaluation brief will highlight the results from McQueen High School’s staff and parent surveys. Throughout the brief, percentages reported are based on the number of respondents who answered the item, which may be less than the total number of survey respondents.

Staff Survey

- 31 respondents; 74% certified and 26% classified; 20% response rate.
- 89% felt their school was “good” or “excellent” at making parents feel welcome.
- 63% thought they would benefit from professional development specific to PI “a little or “some.”
- 59% reported that in professional learning community meetings PI was talked about as a strategy for improving student academic achievement “frequently” or “very frequently.”
- 89% believed others at their school thought PI was “important” or “extremely important.”
- 59% would place a “high priority” on increasing PI in their school.
- 89% thought PI makes a “major contribution” to a child’s academic success.

Standards of Parent Involvement

School staff were asked to rate how well the school is doing with respect to the six well-established standards of parent involvement (PI). The items were combined to create a mean rating for each of the six standards. The response scale on these items were 1=poor, 2=fair, 3=good, and 4=excellent.

The bar graph to the right compares McQueen’s staff ratings to those of all WCSD high school staff who completed the survey. McQueen’s mean ratings ranged from 2.5 to 3.1. The highest mean rating was in the area of student learning, while the lowest was related to school decision making.

6 Standards of Parent Involvement

| | |
|---|--|
| Communication | Communication between home and school is regular, two-way and meaningful. |
| Parenting | Parenting skills are promoted and supported. |
| Student Learning at Home | Parents play an integral role in assisting student learning. |
| Volunteering | Parents are welcome in the schools and their support and assistance are sought. |
| School Decision Making | Parents are full partners in the decisions that affect children and families. |
| Collaborating with the Community | Community resources are used to strengthen schools, families and student learning. |

School's Barriers and Strengths Related to PI

- **Greatest Barrier to PI:** Parents' work schedules (30%)
- **Greatest Strength for PI:** Positive staff attitude (48%)

School's Actions to Encourage PI

- Provide translation and/or interpretation services (29%)
- Hold meetings and events at different times of day (32%)

Parent Survey

Every parent in the school district was mailed a parent involvement survey written by members of the PIC. As part of the survey development process, parents outside of the PIC were also consulted for feedback and suggestions. The survey was mailed to 1815 McQueen High School parents, and 573 were returned, yielding a response rate of 32%. The top three ways that parents got most of their information about school were from EdLine (31%), when their child told them (15%), and phone calls from the school (15%). Forty-seven percent reported that all of their child's teachers post information on EdLine.

Parent Respondent Demographics

- 82% were mothers.
- 6% of the surveys were completed in Spanish.
- 14% were Hispanic/Latino; 72% white; 14% other.
- 79% had lived in Washoe County 6 years or more.
- 73% had one child in school.
- 93% had Internet access at home

McQueen HS Student Demographics

- 12% Hispanic/Latino
- 72% white; 16% other
- Transiency Rate: 16%
- Free/Reduced Lunch: 10%
- Limited English Proficiency: 2%

Parent Contact and Involvement with School

| | McQueen HS | All WCSD HS |
|---|------------|-------------|
| Attended 3-5 school events a year | 35% | 35% |
| Contacted the school between 3-5 times in the past year | 41% | 41% |
| Had been asked to volunteer | 61% | 56% |
| Had volunteered for their child's school | 58% | 55% |
| Had not volunteered but would like to | 48% | 48% |
| Used EdLine to track child's progress | 70% | 66% |

Opinions about Parent Involvement

Parent respondents indicated their level of agreement with 12 statements about parent involvement at their child's school (see bar graph on the page to the right). Responses could range from 1=strongly disagree to 5=strongly agree. The level of agreement was fairly high ranging between a mean of 3.4 to 4.2. The lowest level of agreement was on the item "my child's school wants to hear my ideas about how to make the school better." The highest level of agreement was for the item "school employees are polite to me when I call the school."

Comparisons of English-speaking and Spanish-speaking parents' responses

- English-speaking parents (59%) were more likely to have volunteered at their child's school than Spanish-speaking parents (38%).
- Spanish-speaking parents were more likely than English-speaking parents to agree that "in addition to report cards, this school tells me about my child's learning and grades;" "this school will help me assist my child with homework and learning;" and, "students at my child's school are treated fairly by all teachers and staff no matter what their race, cultural or family background."

Comparisons of white and non-white parents' responses

- White parents were more likely to have Internet access at home (95%) and to use EdLine (71%) than non-white parents (85% Internet; 53% EdLine).
- White parents had attended more school events in the past year than non-white parents.
- White parents were more likely to have been asked to volunteer (66%) than non-white parents (50%).
- White parents (65%) were more likely to have volunteered than non-white parents (39%).
- Non-white parents (39%) who had never volunteered at their child's school were more likely to want to do so than white parents (63%).

Acronyms: WCSD = Washoe County School District; HS = High School;
PIC = Parent Involvement Council; PI = Parent Involvement

Conclusions and Recommendations

Communication seems to be one of the strongest areas of parent involvement at McQueen High School. School staff respondents rated communication as a top area of parent involvement in their school. Parent results were similar with high levels of agreement on several communication-related items. School staff respondents also rated student learning at home as a top area of parent involvement in their school; however, parent results suggest that the school could better help parents assist their children with homework and learning. Results from both the school staff and parent surveys suggest that school decision making is an area in which McQueen High School could strengthen parent involvement.

As parent involvement is a viable and necessary strategy for student achievement, a general recommendation is to reallocate school site funding to support systemic implementation of parent involvement. Another recommendation is to provide all school staff with appropriate professional development on how to effectively engage parents in their children's education. Schools also should help parents understand academic standards, state and district assessments, how to monitor a child's progress and work with educators to improve the achievement of their children. A variety of strategies to improve parent involvement are highlighted below.

Strategies to Improve Parent Involvement

General

- Reallocate school site funding to support systemic implementation of parent involvement. Example: Pay teachers overtime for working with parents at school wide meetings from the school general fund budget.
- Provide appropriate professional development to all school staff on how to effectively engage parents in their children's education. Example, customer service training for education support professionals; training for teachers in how to reach out to, communicate with, and work with parents as equal partners.

Student Learning at Home

- Provide information and ideas to the family to increase family participation in setting student goals each year and in planning for college or work.
- Provide information for families on skills required for students in all subjects at each grade.

School Decision Making

- Create networks to link all families with parent representatives.
